

ARTICLE III: DISTRICT REGULATIONS

Section 301. Allowed, Permitted, Conditional, and Interim Uses

Permitted, conditional, and interim uses are enumerated by each zoning district according to the Land Use Regulation Matrix. Permitted, conditional, and interim uses shall meet the required criteria of both the zoning district and any overlay district. In cases where two standards exist, the stricter standard shall apply.

Building and/or Land Use Permits are required unless specifically exempted or allowed without a permit. There shall be erected or placed no more than one principal use or structure on any lot in a C, R-1, R-2 or R-3 District. In all other districts a second principal use or structure may be approved via conditional or interim use permit.

Whenever an application proposes a use not identified by this Ordinance as either a permitted, conditional or interim use, the Planning Administrator, after reviewing the Comprehensive plan and in consultation with the Planning Commission, either formal or informal, shall issue a statement of clarification, finding that the use is either substantially similar in character and impact to a use identified as either allowed, permitted, conditional or interim within the particular district, or that the use is not sufficiently similar to another use listed within the district. Such statement of clarification shall include the findings that led to such conclusion, and shall be filed in the official repository of Northern Township.

If the proposed use is not sufficiently similar to a use regulated as either a permitted, interim, or conditional use in the specific district, the use shall be prohibited. If an enumerated use in the Land Use Regulation Matrix is not specifically identified as allowed, permitted, conditional, or interim; then such use shall be deemed prohibited in the corresponding zoning district.
